

Make every lecture audible.

LectureLens transforms visual lecture material into a listening-first lesson with structure, context, and tools that help ideas stick.

A focused companion for students who learn better by listening, revisiting, and asking one more question.

From slide to study session in one calm flow.

The product keeps the learner in motion: bring material, choose the level of explanation, then move between listening, reading, practice, and questions without losing the source.

0

1 Bring the material

Upload a PDF or slide image, or paste source text directly.

0

2 Find the meaning

Extract structure, create a natural explanation, and surface key points.

0

3 Keep learning

Listen, replay, quiz yourself, open flashcards, and ask the lesson tutor.

What makes the experience feel complete

Listening-first narration Paragraph-level playback, voice selection, speed control, and resume progress.	Deck intelligence Structured slide map with independent playback for each slide in a PDF.
Study kit Summary, quick quiz, flashcards, next steps, and interactive scoring.	Grounded tutor Follow-up answers stay constrained to the current lesson source.

Photosynthesis, heard three ways.

The built-in offline demo now shows the product's strongest promise: one concept becomes a small, navigable lesson rather than a flat transcript.

01	THE BIG IDEA Plants turn light energy into stored chemical energy.	PLAY
02	INPUTS AND OUTPUTS Sunlight, carbon dioxide, and water become glucose and oxygen.	PLAY
03	THE EQUATION $6\text{CO}_2 + 6\text{H}_2\text{O} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$	PLAY

THE LEARNER GETS

A guided narration, a source transcript, key takeaways, a study kit, a deck map, replayable paragraphs, and a tutor that can explain the detail that did not land the first time.

A strong prototype with a clear next horizon.

LectureLens already demonstrates the core learning loop locally and in a serverless-friendly Flask app. Its next stage is operational depth, not a change of direction.

BROWSER	FLASK API	OPTIONAL AI
Uploads, Web Speech playback, local history, quiz state	PDF extraction, OCR/vision handoff, narration, study kit, tutor	OpenAI-compatible narration and structured coaching

The next product moves

NOW	Polish the guided demo and validate the multi-slide learning flow.
NEXT	Add accounts, persistent lesson storage, background processing for long decks, and downloadable browser audio.
NORTH STAR	Make every lecture format feel like a personal, accessible study session that remembers where the learner left off.

LectureLens

Making visual learning audible, one lecture at a time.

Built with Flask, PyMuPDF, optional OpenAI-compatible services, and the device's own speech engine.
